

Allowing Independent Stage Transitions

Last Modified on 05/14/2018 4:56 pm EDT

Questionnaires associated with an assessment can advance through workflow stages independently (although entities under assessment can be in different workflow stages, questionnaires had to transition workflow stages in unison in RiskVision solution before 4.1.version.)

By default, questionnaires advance through workflow stages together. Questionnaires all start in the first stage of a workflow ("Information Gathering," for example) and must reach the Terminal stage together.

Relationships with a set of standard workflow templates, including " Assessments with Branching," which supports independent stage transitions. In addition, you can create custom templates that allow independent stage transitions, also known as branching.
