

# Viewing Content Version

Content versions can be viewed on the **Summary** tab of **Program** details page. Only the controls and/or questionnaires that are created within a content pack or control objective will be versioned when the workflow associated with a content pack or control objective is moved to the **Deployed** stage. Only the latest version of the deployed content is visible in the **Content** section of the **Summary** tab. To incorporate the content changes in your program, you must update the controls at the program level. For information about how to apply the content changes at a program level, see [Update Content](#) under the [Synchronizing the Changes in Program](#) topic.

The following graphic shows the version information of the content in the **Content** section.

**Assessments** **Summary** **Risk Register** **Changes** **Documents** **Comments** **Applications**
