

Import a Relationship

You will need the **EntityRelationshipImportTemplate.xls** file to import relationships between entities and entity collection.

To import relationships:

1. In the RiskVision application, use one of the following navigation:
 - Go to **Entities > Entities** and select an entity to open its details page.
 - Go to **Entities > Entity Collections** and select an entity collection to open its details page.
2. Click the **Relationships** tab, then click **Import Relationship**.
3. Click **Browse**, select the **EntityRelationshipImportTemplate.xls** file, click **Open**, and then click **OK**.
