

Create and Delete Relationship Types

Started in version 7.0, RiskVision provides the ability to create and delete a relationship type when `com.agilience.asset.enableCreateRelationshipTypes=true` property is added to the `agilience.properties` file. You can only delete the relationship types you have created, if the relationship type is not in use.

To create a new relationship type:

1. Go to **Configuration > Entity Configuration**. The **Relationships** tab details are displayed.
2. Click **New**. The **Create New Relationship** dialog appears.
3. In the dialog, enter the following fields.
 - **Relationship Name**: Name of the relation between entities.
 - **Inverse of Relationship**: Name of the reverse relation.
 - **Description**: The purpose of creating the relationship type.
4. Click **OK**.

User-defined relationship type allows the establishment of the relation only between the entities.

To delete a relationship:

1. Go to **Configuration > Entity Configuration**.
2. Select a custom relationship type.
3. Click **Delete**.
