Add Object Fields to Email Templates

You can add fields from an object's details page as workflow-type variables in stakeholder notifications. You can even include custom attributes that you have added to the objects. The following field types can be added to any email template:

FIELD TYPE	VARIABLE
String	\$NT.getValue(".customAttributes.")
Number	\$NT.getValue(".customAttributes.")
Boolean	\$NT.getValue(".customAttributes.")
Date	\$NT.getValue(".customAttributes.")
