

Change the Setting of an Ownership Type

You can change the display name and role restrictions. Modifying role restriction only affects new ownership assignments.

To modify an ownership type settings:

1. Go to **Configuration > Ownership Types**.
2. Select the ownership type.
3. Click **Edit**. The **Configure Ownership Type** dialog appears.
4. Modify the configuration and click **OK**.

The display name is updated immediately. Role restrictions apply to the next owner assignment.
