

Define a New Organization

Entities can be associated with multiple nodes in an enterprise's organizational hierarchy. For example, the hierarchy might be defined by location and division. An entity might belong to a particular department and may be located in a particular facility.

In previous versions of RiskVision, each entity had single-value fields for organization, division, and subdivision.

Associated nodes are in the organizational hierarchy with an entity on the **General** tab of the entity.

The screenshot shows a table titled "Organization Hierarchy" with a dropdown arrow to the left. Below the title, it says "1-1 of 1". There are three buttons: "Add", "Delete", and "More Actions..." with a dropdown arrow. On the right, there is a "Filter by" dropdown menu set to "- Show all -" and a "Refresh" button. The table has three columns: "Organization Root", "Path", and "Description". There is one row with a checkbox in the first column, "Datacenter" in the second, "/Datacenter/Florida Datacenter" in the third, and "N/A" in the fourth.

<input type="checkbox"/>	Organization Root	▲ Path	Description
<input type="checkbox"/>	Datacenter	/Datacenter/Florida Datacenter	N/A

The Organization Hierarchy in the General tab of an entity.

Your organizational hierarchy defines your enterprise. You can define various hierarchies and combine them to cross-categorize your entities. For example, your organizational trees might be defined based on:

- Organization: Division, subdivision, department, group.
- Location: Country, region, facility, building, floor, section.
- Function: Retail/b2b, industry, market.

To create an organization node:

1. Go to **Entities > Group Definitions** and click **Organizational Hierarchy** in the tree.
2. Click **New Organization Group**, or navigate to an existing node and click **Actions > New Child**.
3. Click **Go** and enter the new child node's name and description.
4. Click **Save**.

Note:

- Nodes can also be copied, moved, and deleted using the **Actions** dropdown menu.
- From release 6.5 SP1 HF3 on, the organizational hierarchy supports a maximum number of 15 nodes
