Override Inherited Controls

When an entity or entity collection inherits two or more of the same controls/subcontrols rather than accepting the auto-subscribed results, you can choose the winning control/subcontrol on your own.

To override an inherited control:

- 1. In the RiskVision application, go to Assessments > Assessments. The Assessments page is displayed.
- 2. Select an assessment to open its details page and click the **Propagation** tab to display the **Inherited Controls Details**.

	🚺 * Th auto	* The date and time of last updated is the date and time that the assessment has been updated. Assessment propagation is automatically updated when survey questions are answered and when assessments are added to or deleted from program.									
	🚺 ** A sele	** A check mark indicates that multiple results are being inherited for the same subcontrol. To change the winning subcontrol, select the subcontrol and hit the "Show Details" button.
