MySQL Post-Installation Script

To run the MySQL post-installation scripts:

1. Using command line, Go to the folder where scripts are installed
   - Example, `cd C:\Server\MySQL_PI`

2. Ensure that all the files included `agl_master.sql` are in this folder.

3. Execute the following command to load the scripts and make sure that MySQL executable is set in the path correctly so that it can be accessed from anywhere `.mysql -h[hostname] -u[username] -p [databasename] < agl_master.sql`
   - Example, `mysql -hlocalhost -uagiliance -p agiliance < agl_master.sql`
