

## About Vendor Risk Manager

Vendor Risk Manager enables organizations to audit and manage third-party risks, as mandated by regulations and standards such as ISO 27001, PCI, and FISMA. Vendor Risk Manager classifies, assesses, and reports on third-party risk based on the standard control framework from shared assessment programs or an organization's custom control framework. Vendor Risk Manager provides a portal where vendors participate in assessments and the results are retrieved by an organization's risk analysts. Vendors are classified automatically into appropriate tiers and applicable controls are applied based on the vendor tier. Powerful delegated administration and automation features enable Vendor Risk Manager to scale to large vendor populations.
