Notify the Assessment Owner

To notify the assessment owner, stakeholders must access the assessment at the first stage of the workflow. If you are a program owner and want your assessment owners to receive notifications, you must perform the following steps before you create a program:

- 1. Go to the <code>%AGILIANCE_HOME%\config</code> directory, open the <code>agiliance.properties</code> file using a text editor, and add the following properties:
 - notify.assessment.owner.enabled=true set this property as 'true' to enable the effect of the Notify primary owner when assessment is accessed option.
 - com.agiliance.assessment.surveystart.notifyowner.emailTemplate= specify the email template's name with which you want to notify stakeholders when a questionnaire is accessed first.
- 2. Restart the Tomcat application server to update to the latest changes.
- 3. Once the Tomcat application has restarted, open the assessment workflow details. Click**Edit** to bring the workflow into edit mode, scroll down to the details of the first stage, and select the box next to the **Notify** primary owner when assessment is accessed option.

When assessments are accessed for the first time, a notification is automatically sent to the primary owners of the respective assessments.
