

Define More Complex Selection Conditions

The Selection Criterion editor can be used to specify complex AND and OR conditions. In addition, parentheses can be used to [specify sub-conditions](#).

For example, if you create three conditions, such as **Priority** \neq **Medium**, **Owner** = **John**, and **Type** = **Audit Finding**, you can choose:

CONJUNCTION	DESCRIPTION
AND	All conditions must be true to select this workflow.
OR	This workflow will be selected if any of the conditions are true.
XOR	Exclusive OR. Select the workflow if one of the conditions is true, but not if more than one is true.

The screenshot shows the 'Selection' tab of the 'Ticket Workflow' editor. On the left, a blue sidebar contains 'Definition', 'Stages', and 'Selection'. The main area shows an 'OR' conjunction dropdown. Three conditions are listed, each with a red 'X' icon to its left: 'Priority' with a dropdown set to 'Not equals' and a value of 'Medium'; 'Owner' with a dropdown set to 'Equals' and a value of 'John'; and 'Type' with a dropdown set to 'Equals' and a value of 'Audit Finding'. Below the conditions are two buttons: a '+' button and a '+ {}' button. At the top right of the editor, there are 'Save' and 'Cancel' buttons.

The Selection Criterion editor.
