

Overriding Inherited Controls

When an entity or entity collection inherits two or more of the same controls/subcontrols rather than accepting the auto-subscribed results, you can choose the winning control/subcontrol on your own.

To override an inherited control:

1. In the RiskVision application, go to **Assessments > Assessments**. The **Assessments** page is displayed.
2. Select an assessment to open its details page and click the **Propagation** tab to display the **Inherited Controls Details**.

Assessment Details | **Entity Details** | **Propagation**

Inherited Controls

Filter by

	Subcontrol	Originating Source	Direct Source	Type	Compliance	Winning Control
<input type="radio"/>	Risk assessment	parent2	37793 parent2	Inter-System	40.0	✓
<input type="radio"/>	Risk assessment	Parent1	37793 Parent1	Inter-System	40.0	N/A

4. Choose a control/subcontrol instance, and click **Select Winning Control**.
5. A message to confirm the selection of winning control appears. Click **OK** to select the winning control.
6. Click **OK** to exit the **Inherited Controls Details** dialog. The newly-created winning control has overridden the inherited control/subcontrol.
