Setting User Session Timeout

By default, the RiskVision solution logs out inactive sessions after 30 minutes. Session time-out is a system-wide setting. The session time-out period is set when the session is opened. Changing this setting does not affect open sessions.

To change the time-out setting:

- 1. In the Administration application, go to Administration > Server Administration > Configuration.
- 2. Click Edit.

Configuration	Web link for the notification emails https://QA32-2K8.agiliance.com
Commands	Session Timeout
Support	
Health Report	Ifter a period of inactivity, user has to login again from the browser. The value is in minutes.
Documentation	Session Timeout 300000
About	30000

- 3. In the Session Timeout field, enter the interval in minutes.
- 4. Click Save.

All sessions opened after you saved the setting will have the new time-out period.
