Testing Charts

The RiskVision solution requires Adobe Flash to render charts. Use the Chart display to verify that Flash is installed and rendering charts.

To test charts:

1. In the Administration application, go to Administration > Server Administration > Support.

The **Support** tab details are displayed.

Administration Use	ers Events						
Server Administration	External Authentication	SAML Configuration	Notifications	Connectors	Email Templates	Queued Jobs	About this page
Server Administration Save 🕄 Cancel 😒							
	In the Log section, click Download next to SQL Queries Log for viewing the printed details.						^
	Print the table name and corresponding row count in log.						
	▼ Chart Testing						
Information	If you can read this,						
Configuration	charts are	working.					
Commands		Fare					
Support >	Charts						
Health Report							
Documentation							
About							
	working- working -						

2. Double click the **Chart Testing** text to expand the section.

As the screen explains, if you can see the image, the charts are working correctly.
