

# Modifying the Connector Configuration

Users with sufficient privileges can modify a connector configuration.

## To change the connector configuration:

1. In the Administration application, go to **Administration > Connectors**.

The **Connectors** page is displayed.

	Status	Health	Type	Name	Description	Version
<input type="checkbox"/>	▶▶	✖	BigFix Connector	QA116	Connects to BigFix to import assets, vulnerabilities and other information into RiskVision	7.5.0.0
<input type="checkbox"/>	▶▶	✖	Bulk Data Connector	QA116	File based import connector	7.0.2.7157
<input type="checkbox"/>	▶▶	✖	CA CMDB Connector	QA32-2K8	Integrates with Database	6.5.7082.192
<input type="checkbox"/>	▶▶	✖	File Connector	N/A	File based import connector	7.5.0.0
<input type="checkbox"/>	▶▶	✖	Fortify Connector	QA32-2K8	File based import connector	7.5.0.0

2. Select a connector.

The **Connector** details pane displays below the table.

3. Click the **Configuration** tab.
4. Click **Edit**.
5. Change the settings as appropriate.
6. Click **Save**.

For more information about configuring and troubleshooting a specific connector type, please contact Customer Support to obtain the connector guide.
