

Allowing Stakeholders To Delegate

For each stage, except the terminal stage (closed), you can allow stakeholders to delegate their responsibility to another user or team. The delegate action adds the delegatee as a stakeholder and notifies them of their new task. The delegatee then acts as the original stakeholder.

To allow delegation:

1. Open a workflow for editing.
2. Open the stage.
3. Select **Allow Delegation**.
4. To change the label, enter the new button name.

The screenshot shows a configuration panel for 'Allow Delegation'. It includes a checked checkbox for 'Allow Delegation', a text input field for 'Delegation Label' containing the word 'Delegate', a 'use Email Template:' label, a dropdown menu for 'Do not send Email', a 'Preview' button, and a checked checkbox for 'Allow additional stakeholders to be added'.

5. Click **Save**. New workflow instances will be created from the revised template.

The Delegate label displays in drop-downs, questionnaire taking windows, and other process related places.

Workflow instances that are already in progress are not changed.
