

Setting the Input Parameters

The RiskVision solution populates the available arguments based on the Check Template parameters that you selected. Each argument may have different input parameters.

To specify the value:

The image shows a 'Parameter Editor' dialog box with a blue title bar and a red close button. The dialog contains several fields and options:

- Is this optional:** Radio buttons for 'Yes' (selected) and 'No'.
- Name:** Text input field containing '3/10/2017'.
- Display Name:** Text input field containing '3/10/2017'.
- Description:** Text area with a small grid icon in the bottom right corner.
- Data Type:** Dropdown menu showing 'String' with a downward arrow.
- DefaultValue:** Text area with a small grid icon in the bottom right corner.
- Is this a choice list:** Radio buttons for 'Yes' (selected) and 'No'.
- Value Choices:** Text area with a small grid icon in the bottom right corner.

At the bottom right of the dialog are two buttons: 'OK' (blue) and 'Cancel' (grey).

1. Select an argument.
2. Click **Edit**. The **Parameter Editor** dialog appears.
3. Choose whether you want the argument to be optional, specify Name, Display Name, and Description, choose a Data Type, specify the default value for the selected string, choose whether the argument is a choice list and specify the value for choices, if you wish to make the argument a part of choice list.
4. Click **OK**.
