

Running a Chart

Running a chart combines a chart definition with the latest information. To run a chart, you will need the Dashboards and Reports View permission.

To run a chart:

1. On the **Analytics** menu, click **R6 Charts**.
2. Locate the chart group containing the desired chart in the tree on the left. Click the chart group to display the charts that the group contains. Locate the desired chart in the list on the right, and check the box associated with the chart.
3. Click **Run**.
