

About Conjunctions

Join operands to create a truth table as follows. A single filter can mix AND and OR conjunctions, but the results may not match the author's intent, due to precedence rules. The expression X AND Y OR Z can be interpreted as true only when X and either Y or Z are true, or it can be interpreted as true when either Z or both X and Y are true. Avoid mixing both conjunctions in the same filter. Instead, create two filters and use the 'Matches filter' operator to combine them.

| Conjunction | Description |
|-------------|--|
| AND | Returns true if all conditions are true and false if any condition is false. |
| OR | Returns true if any condition is true and false if all conditions are false. |

For users, other than the RiskVision administrator, filters can be viewed on the Configuration > Filters menu with the Filter View permission. Creating, modifying, or deleting a filter requires you to have the Filter View and Filter Update permissions.
