

Understanding Entity Collection Details

Unlike with entities, entity collection details tabs do not vary. When you create an entity collection, it's created as 'entity collection' type entity in RiskVision. As a result, tabs, such as [General](#) , [Assessments](#) , [Owners](#), [Description](#), [Addresses](#), [Classification](#), [Cost & Impact](#), [Relationships](#), [Documents](#), and [Data Feeds](#) that are commonly available in details page of various entity types can also be found in the entity collection details page. As a primary owner of an entity collection, it is important to understand the following tabs to configure and manage an entity collection.

Tab	Description
Composition	Displays the number of objects grouped by type that constitutes an entity collection. Click an entity type to drill down into all the entities of that type.
Entities	Displays the objects available in an entity collection. The Entities tab allows you to manage entity collection members, such as, entities and dynamics groups. Use Remove option to remove entities that are a part of dynamic group or entity collection and choose Remove Dynamic Groups from the More Actions drop-down list to remove a dynamic group.
