## **Content Actions Overview**

The RiskVision solution allows you to use RiskVision Content, out-of-the-box, and apply or assign read-only controls from the RiskVision Content library to entities in your enterprise. Create your own customized framework and hierarchy of controls under the Organization Content node in the Controls & Questionnaires navigation pane. By defining controls in this area, you can leverage existing RiskVision Content by choosing the frameworks, standards, and regulations for which you will measure compliance and risk, and then tailor and customize the controls to fit the exact requirements of your organization.

This section describes the actions available for tailoring and customizing content in the Organization Content hierarchy.

<ul> <li>that contains key risks. This type of control and subcontrol uses the Key risk indicators (KRIs) model.</li> <li>The sub controls (questionnaires) also have additional attributes to hold scoring thresholds, as well as input values for number, time, and frequency- based reporting.</li> <li>For example, a user may enter multiple sets of values for a questionnaire question, where each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the user may enter a value for January, February, March, etc.</li> </ul>
of control and subcontrol uses the Key risk indicators (KRIs) model. The sub controls (questionnaires) also have additional attributes to hold scoring thresholds, as well at input values for number, time, and frequency- based reporting. For example, a user may enter multiple sets of values for a questionnaire question, where each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
Key risk indicators (KRIs) model. The sub controls (questionnaires) also have additional attributes to hold scoring thresholds, as well ar input values for number, time, and frequency- based reporting. For example, a user may enter multiple sets of values for a questionnaire question, where each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
The sub controls (questionnaires) also have additional attributes to hold scoring thresholds, as well as input values for number, time, and frequency- based reporting. For example, a user may enter multiple sets of values for a questionnaire question, where each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
also have additional attributes to hold scoring thresholds, as well as input values for number, time, and frequency- based reporting. multiple sets of values for a questionnaire question, where each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
multiple sets of values for a questionnaire question, where each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
questionnaire question, where each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
each value corresponds to a point in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
in time. If the question is "Average BCP Test delay (in days)," the use may enter a value for January,
BCP Test delay (in days)," the use may enter a value for January,
may enter a value for January,
LEEDILIARY MARCH ETC
The user also defines entities in
the program for which assessmen
questionnaire answers are used to
calculate risk scores.
Pack Allows you to group customized
content into a package that is
processed, from draft to approved
state, tracks changes between
content versions, and is published
for use in assessments.
See Selecting Domain-Specific
Pack Controls.
Allows you to create a content
pack in a group folder.

Convert to Controls	Group	See Using Configurable Control
with Flexible Tests	Content Pack	Testing.
	Control Objective	
New Control Objective	Content Pack	Allows you to create a control object.
New Control	Content Pack	Allows you to create a new
	Control Objective	control.
Promote to Group	Control Objective	Changes a control objective to a group.
New Group	Content Pack (More actions)	Allows you to create a hierarchical structure in the Organization Content root directory, in a content pack, or control objective.
View Common Controls	Content Pack	Displays a list of referenced controls.
	(More	
	actions)	
Copy to	Content Pack (More actions)	Creates a linked copy of the
	Control Objective	content in the new location.
Move to	Content Pack (More actions)	Cuts and pastes the selected item
	Control Objective (More Actions)	from one area to another and
		updates pointers from other
		content to the new location.
Delete	Content Pack (More actions)	Removes content from the
	Control Objective (More Actions)	system.
Details	Content Pack (More actions)	Displays all information related to
	Control Objective (More Actions)	the object.
Export	Content Pack (More actions)	Creates an XML file that contains
	Control Objective (More Actions)	all the content and attributes
Browse Versions	Content Pack (More actions)	Shows what previous versions
	Control Objective (More Actions)	contained. Allows you to see
		differences between selected
		versions. Users can also export
		the selected version of a control
		as an excel report.
Customize	All	Allows you to customize which
		columns display and their labels in
		the table.
