## **Finding Import Template**

Attribute Description \*Name Specify the name of the finding. Enter the title of the control to which you will associate a finding. When controls become Control non-compliant, you can specify for which controls the findings should be created. Enter the status of the finding when imported into the RiskVision application. Leaving Status this field blank will set the status to 'Open.' Description Any additional information that helps understand the purpose of creating a finding. Specify a value between 0 and 10 to provide an opinion as to how often the finding \*Likelihood occurs. The value you specify here fetches a likelihood rating based on the threshold range configured on the Findings Configuration page. Specify a value between 0 and 10 to provide an opinion as to how the finding affects \*Impact your organization. The value you specify here fetches an impact rating based on the threshold range configured on the Findings Configuration page. Specify a value between 0 and 10 to provide an opinion that after following certain Residual procedures the chances of occurrence will subside. The value you specify here fetches Likelihood an impact rating based on the threshold range configured on the Findings Configuration page. Specify a value between 0 and 10 to provide an opinion that if certain remediation procedures are followed the chances of occurrence will subside. The value you specify Residual here Impact fetches an impact rating based on the threshold range configured on the Findings Configuration page. Owner The owner is the user importing the findings into RiskVision application. Team Enter the team so that the finding can be worked on by a group of stakeholders.

The table below lists the attributes available for importing findings:

Attribute Response	Description
Title	Enter the title for the response if you want to mitigate a finding using a response.
Response Action	Enter an action for the response. For example, if you are going to mitigate a finding's effect, the response action is usually set as 'Mitigate.'
Response Comment	Any additional information that helps understand the purpose of creating a response.
Response Owner	The user importing the findings into RiskVision application is the response owner.
Response Status	Enter the status of the response. Note that the status 'Implemented/Completed' mitigates the risk score of a finding.
