

## Overriding Inherited Controls

When an entity or entity collection inherits two or more of the same controls/subcontrols rather than accepting the auto-subscribed results, you can choose the winning control/subcontrol on your own.

### To override an inherited control:

1. In the RiskVision application, go to **Assessments > Assessments**. The **Assessments** page is displayed.
2. Select an assessment to open its details page and click the **Propagation** tab to display the **Inherited Controls Details**.

The screenshot shows the 'Assessment Details' page with the 'Propagation' tab selected. The page includes a sidebar with navigation options: 'Assessment Details', 'Entity Details', and 'Propagation'. The main content area displays the 'Date and Time of Last Update' as 2014-02-03 16:30:03. Below this, there are two informational messages. The first message explains that the date and time of last update is the date and time that the assessment has been updated. The second message explains that a check mark indicates that multiple results are being inherited for the same subcontrol. Below the messages, there is a section titled 'Inherited Controls' with a '1-1 of 1' indicator. There are two buttons: 'Revoke Inherited Results' and 'Show Details'. Below the buttons is a table with the following data:

<input type="checkbox"/>	Control/Subcontrol	Originating Source	Direct Source	Type	Compliance	Multiple Results**
<input type="checkbox"/>	4.1 Assessing security risks	N/A	N/A	N/A	N/A	N/A
<input type="checkbox"/>	4.1.1 Risk assessments	N/A	N/A	N/A	N/A	N/A
<input type="checkbox"/>	Risk assessment	parent2	parent2	Inter-System	40.0	✓

3. Check the box next to the control/subcontrol for which you would like to select a winning control, and then click **Show Details**. The **Inherited Controls Details** dialog appears.

**Inherited Controls Details** ✖

1-2 of 2

Filter by

	Subcontrol	Originating Source	Direct Source	Type	Compliance	Winning Control
<input type="radio"/>	Risk assessment	parent2	37793 parent2	Inter-System	40.0	✓
<input type="radio"/>	Risk assessment	Parent1	37793 Parent1	Inter-System	40.0	N/A

4. Choose a control/subcontrol instance, and click **Select Winning Control**.
5. A message to confirm the selection of winning control appears. Click **OK** to select the winning control.
6. Click **OK** to exit the **Inherited Controls Details** dialog. The newly-created winning control has overridden the inherited control/subcontrol.
