

Specifying Sub-conditions

EXAMPLE

You want to select this workflow when **Priority > Medium**, when **Owner is John**, or when **Type is Entity Control Resolution, Risk Assessment Mitigation, or Other**. To specify the last three sub-conditions, you use the + { } button.

The screenshot shows the 'Selection Criterion editor' for a 'Ticket Workflow'. The interface includes a sidebar with 'Definition', 'Stages', and 'Selection' tabs. The main area displays a logical expression for selecting the workflow. The expression is: **Priority** Not equals **Medium** OR **Owner** Equals **John** OR **AND** (**Type** Equals **Entity Control Resolution** AND **Type** Equals **Risk Assessment Mitigation** AND **Type** Equals **Other**). The 'AND' operator is used to nest the three sub-conditions. The 'OR' operator is used to combine the three main conditions. The interface includes 'Save' and 'Cancel' buttons in the top right corner.

The Selection Criterion editor with sub-conditions.

Sub-conditions can be nested as deeply as necessary. The **OR** and **AND** of the first example might be inverted. You might want to select the workflow when **Priority > Medium** AND when one of a set of sub-conditions is true.

The screenshot shows the 'Selection Criterion editor' for a 'Ticket Workflow'. The interface includes a sidebar with 'Definition', 'Stages', and 'Selection' tabs. The main area displays a logical expression for selecting the workflow. The expression is: **Priority** Not equals **Medium** AND **Owner** Equals **John** AND **AND** (**Type** Equals **Entity Control Resolution** AND **Type** Equals **Risk Assessment Mitigation** AND **XOR** (**Category** Equals **Crit** AND **Category** Equals **Critical** AND **Category** Is null). The 'AND' operator is used to combine the three main conditions. The 'XOR' operator is used to nest the three sub-conditions. The interface includes 'Save' and 'Cancel' buttons in the top right corner.

The Selection Criterion editor with two layers of sub-conditions.

In the previous example, the workflow will be selected only when **Priority** does not equal **Medium**, the **Owner** is **John**, and one of the following conditions is true. Either the **Category** is **Null**, it starts with **Crit**, or it ends with **Critical**. If the **Category** starts with **Crit** and ends with **Critical**, the workflow will not be selected because you used the Exclusive OR (**XOR**) operator.
