

Receiving Delegations From Multiple Users

Multiple users can delegate their accounts to you. When you log in, you will see a list of all of the users who have delegated their access to you from the names other than Myself. That appear in the drop-down list of users who you can log on as delegate. Additionally, after you log in to your account, if you have the permission to view the **Access Delegation** tab in the **User Settings** page, you can see which users have delegated their accounts to you using the **Assigned Access Delegations** section, as shown in the figure below. You can also see the date on which each access delegation expires.

The screenshot shows the 'User Settings' interface. On the left is a navigation menu with options: User Information, Change Password, Teams, Dashboards, and Access Delegation (which is highlighted). The main content area is titled 'Delegate to Another User' and includes an information box stating: 'Delegated user will be able to login and take actions based on assigned permissions on behalf of the'. Below this, it shows 'Enable Access Delegation No', 'Delegation Start Date N/A', 'Delegation End Date N/A', and 'Select an user to delegate access N/A'. The 'Assigned Access Delegations' section shows '1-3 of 3' items. A table lists these delegations with columns for checkboxes, First Name, Middle Name, Last Name, Start Date, and End Date. The table contains three rows: Agiliance (R User, 2013-10-11 to 2013-10-15), Demo user (C B, 2013-10-12 to N/A), and John (A Doe, N/A to N/A). A 'Filter by' dropdown is set to '- Show all -' and there is a 'Refresh' button.

<input type="checkbox"/>	First Name	Middle Name	Last Name	Start Date	End Date
<input type="checkbox"/>	Agiliance	R	User	2013-10-11	2013-10-15
<input type="checkbox"/>	Demo user	C	B	2013-10-12	N/A
<input type="checkbox"/>	John	A	Doe	N/A	N/A
