

## Configure a Web Services Connector

If you are running version 6.5 or higher of RiskVision, you must configure only the following property:

- **WebServicesClient.properties**

If you are running a version of RiskVision older than version 6.5, you must configure only the following properties:

- **itgrcxml-ws-client-configuration**
- **agiliance-heartbeat-client-configuration**

### To configure **WebServicesClient.properties**:

1. Navigate to the `%WebservicesClient_HOME%\etc\conf` folder and open the **WebServicesClient.properties** file using a text editor.
2. Change the URL of the element as specified below:

```
agilianceWebServiceUrl=https://%AGILIANCE_HOST_NAME%:443/spc/services/agiliancews
```

3. Change the URL of the element as specified below:

```
itgrcxmlWebServiceUrl=https://%AGILIANCE_HOST_NAME%/itgrcxml/services/itgrcxmlws
```

### To configure **itgrcxml-ws-client-configuration**:

1. Navigate to the `%WebservicesClient_HOME%\etc\conf` folder and open the **itgrcxml-ws-client-configuration** file using a text editor.
2. Change the URL of the element as specified below:

### To configure **agiliance-heartbeat-client-configuration**:

1. Navigate to the `%WebservicesClient_HOME%\plugins\com.agiliance.itgrcxml.heartbeat.plugin\conf` folder and open the **agiliance-heartbeat-client-configuration** file using a text editor.
2. Change the URL of the element as specified below:
