

Configure the Local Logout

To configure the local logout:

1. Navigate to the `%SHIBBOLETHSP_HOME%\etc\shibboleth` folder and open the `shibboleth2.xml` file using a text editor.
2. Set the `LogoutInitiator` to `Local` as shown below:

```
<LogoutInitiator>Local</LogoutInitiator>
```
3. **Optional:** To customize your local logout screen, update the `localLogout.html` file in the `%SHIBBOLETHSP_HOME%\etc\shibboleth` folder. Users who log out of RiskVision will be taken to whatever is in the `localLogout.html` file.
4. Restart the Shibboleth 2 Daemon to put these changes into effect.
