Batch Edit Compensating Controls

Users with the Entity View, Threats and Vulnerabilities View, and Vulnerability Compensating Control Update permissions can use the **Batch Edit** VCC action to edit the status of multiple vulnerability compensating controls attached to a single entity. Alternatively, users with the Entity View, Entity Manage, Threats and Vulnerability View, and Vulnerability Compensating Controls Update permissions can edit vulnerability compensating controls attached to multiple entities.

Batch editing vulnerability compensating controls across multiple entities can only be done for compensating controls that the entities have in common.

To batch edit vulnerability compensating controls on a single entity:

1. In the Threat & Vulnerability Manager application, navigate to **Entities** > **Entities**.

Home	Entities	Vulne	rabilities	5 Threats	Technologies	Content	Analytics	Configuration	Show G	Graph	Entity name	Search
Entities	Entity Collection	ons G	roup Defini	tions Entity M	anagement
