

Version 9.6 Bug Fixes

<i>SUPPORT TICKET ID</i>	<i>INTERNAL TICKET ID</i>	<i>DESCRIPTION</i>
45493	RRV-5545	A connector's heartbeat value can now be set to be less than one minute to a minimum of 30 seconds.
45440	RRV-5633	Users can now upload documents to Riskvision to a maximum of 5 GB.
N/A	RRV-5758	The Change History & Audit Log setting can now be enabled on external tickets.
43078	RRV-5909	Resolved an issue where users were unable to import CVEs from the NVD when RiskVision requests a vulnerability import through the connector manager.
47306	RRV-5972	Entities in the Ticket Grid will no longer show duplicate entries in the Awaiting Action By column.
N/A	RRV-6139	Resolved an issue where all buttons on a ticket's workflow would appear clickable even if some of them were not.
49993	RRV-6268	All email notifications sent from RiskVision will no longer display HTML tags.
48464	RRV-6294	Fixed a bug that prevented patch references from being updated when vulnerabilities were being imported from the NVD.
N/A	RRV-6401	Resolved an issue where importing vulnerability info from a scanner would not update the reference information.
53136	RRV-6550	Users can now edit Application-type entities without returning a Java error.
45790	RRV-6567	After a ticket has been created from a vulnerability's Affected Entities tab, the assigned team will now appear in the ticket's Awaiting Action column along with the assigned user.
N/A	RRV-6651	Fixed a bug that was preventing users with View and Update permissions from performing a batch workflow transition.
N/A	RRV-6652	A ticket log's toStage column will now display the correct value when a user has performed a batch workflow transition.
56875	RRV-6850	Resolved an issue where the RV server was unable to process NVDCVE json files without returning an error.
59262	RRV-6910	Resolved an issue where attempting to access a failed sub-control would return an error message.
46877	RRV-6914	Fixed an issue where restarting an assessment would not clear out the evidence log.
48722	RRV-6917	Fixed an issue where users were unable to add the custom Risk Permanent Id, Residual Impact, and Residual Likelihood columns to the Risk grid.
