

## Replace Dashboard

If desired, users can replace the Threat & Vulnerability Manager dashboard with one of their own.

### To replace the dashboard:

1. Navigate to the `\tomcat\webapps\spc\WEB-INF\classes` folder.
2. Open `UIWorkspace.xml`.
3. Comment the following lines:  

```
◦ <!--  
<!--
```
4. Restart the Tomcat service.
5. Log in to RiskVision.
6. Navigate to **Administration**.
7. Navigate to **Users > Roles**.
8. Select the role to which the default dashboard can be assigned.
9. Edit and add the desired dashboard as the Default Home Page for the role.
10. Click **Save**.
