

View & Export Version History

RiskVision allows users to view the version history of controls and subcontrols and export the history as a CSV file.

To view and export the version history of a control or subcontrol:

1. Open RiskVision.
2. Go to **Content > Controls and Questionnaires**.
3. Navigate to a control or subcontrol in **Organization Content > Controls** in the navigation tree to the left.
4. Check the box next to a control or subcontrol and select **Browse Versions** from the **More Actions** dropdown list to display the **Version History** dialogue.

The Version History dialogue.

5. **Optional:** To view a comparison between two different versions, click the checkbox next to the two desired versions and click **Diff View**.
6. **Optional:** To export a report on a specific version of the control, click the checkbox next to the desired version and click **Export Version**. A report will be downloaded in **.csv** format.
