Version 9.7.1 Release Notes

Release 9.7.1

The following describes the new features and improvements introduced in RiskVision version 9.7.1, released in March 2023.

> *Warning:*
> *An issue in RiskVision version 9.7.1 is causing the cross-site scripting security fix in the Hyperlink Enablement feature from version 9.6 to malfunction.* We have created a patch that will fix the Hyperlink issue. Customers upgrading to RiskVision version 9.7.1 and using this Hyperlink feature will require a patch to get the hyperlink feature working. Please contact our Support team for the RiskVision version 9.7.1 Hyperlink patch.

Third-party Updates

RiskVision now utilities the following versions for Third-party integration to apply security enhancements.

- Apache Tomcat® Version 8.5.85
- MySQL™ Version 5.7.39
- Oracle® 19c
- Jasper Version 8.0.3
- Apache® Version 2.4.54
- Amazon Correcto Version 1.8.0.342
- Apache OpenOffice 4.1.13
- Log4j 2.19

Login Security Enhancement

RiskVision has implemented a rate limitation on login attempts. Implementing this fix will prevent brute-force attacks on your system.

Fix for Stored Cross Site Scripting (XSS) Vulnerabilities

RiskVision has implemented fixes to Stored Cross Site Scripting (XSS) vulnerabilities within the **More Information** section in the **Threat & Vulnerability Manager** section and the **Access the Delegation** message parameter within **User Settings**.

General Enhancements

Description
TAA Compliant Artifacts were built and verified for RiskVision 9.7.1 North America.
Increased the maximum character limitation from 80 to 255 characters when adding a new role in **External Authentication**.
